

BROADLOOM & CARPET TILES BY FLETCO CARPETS

ABOUT FLETCO CARPETS

Quality, craftsmanship and innovation

Since 1947, proud craft traditions combined with a passion for innovation and a sustainable approach have been at the heart of Fletco’s production of high-quality carpets. Founded as a family-owned business, Fletco is mindful of the company’s proud heritage and guided by the values that have driven development since day one: precision, quality, innovation and care for the environment at every stage of the process. We always strive to be at the forefront of technological advances and new environmental standards.

Danish production and in-house test lab ensure long durability

Today, Fletco Carpets is a specialist in flat-woven carpets and one of Europe’s leading suppliers to the international contract market. The company is also both an OEM (Original Equipment Manufacturer) and White Label manufacturer of carpets for many high-end design brands around the world. In addition to weaving and tufting, our production facilities also include dyeing, backing and an in-house test lab. Our top priority is to see quality materialized in every single carpet. Backings made of eco-friendly felt, textile or foam along with unsurpassed stability and first-rate wearability are key elements in ensuring the long durability of a Fletco carpet.

Weaving craft with a human touch

We are proud of our modern, advanced production equipment, with looms and tufting machines that have been continually developed to produce carpets in the most rational and efficient way. The same is true of the other high-efficiency machines we use to produce the carpets. However, even the most technically advanced looms require skilled human operators who master their craft to perfection. Keen eyes monitoring the machines, deft hands threading them manually – and rethreading them if the strand breaks – and, not least, experienced and creative master weavers who create Fletco’s timeless yet distinctive carpet design based on carefully selected materials, functional priorities and the full potential of the loom.

From yarn to carpet in subtle colourways

Creating world-class carpets requires top-quality raw materials. That is why most of our carpets are made from our own proprietary yarns made from white filaments or fibres that are intermingled and twisted. We do this to ensure the high level of quality and subtle colourways that have become hallmarks of Fletco carpets. To avoid waste, meet individual customer demands and ensure fast delivery, most of our carpet designs are woven in white yarn. Subsequently, the carpet is dyed in our own plant, where we can dye the precise amount required for a specific project, whether the order is for 200 or 20,000 square metres.

CARPET TILES
BY FLETCO CARPETS

LOCKTILES®

Carpet tiles with a seamless look

LockTiles® is a patented laser cutting method. With carpet tiles cut in the LockTiles® shape, you can obtain a flooring surface with nearly invisible joints and with an exceptionally good dimensional stability. The laser cut edges interlock around each other and fit together in all directions. The tiles are easy to replace, should a small area be soiled beyond cleaning.

Available in Stellar, Nordic and COM 1000

To obtain the broadloom look with carpet tiles, this sets great demands to the density and pile height of the carpet. The LockTiles® cut is currently available upon demand and in COM 1000, Nordic and Stellar. Surcharge apply.

The advantages of LockTiles®

- Installed in same direction, obtaining a broadloom effect with nearly invisible joints.
- Laser cut edges ensure a perfect fit and helps prevent fraying.
- Single tiles can easily be replaced.

DESIGN AWARDS

STELLAR

– the new star on the floor

A new star in the world of flat-woven carpets has taken shape in our ongoing product development at the loom. Our master weaver has created a unique structure that captures the depth of the cosmos, where stars and other celestial bodies appear on a dark background of infinity and eternity.

STELLAR is the essence of a sustainable, beautiful and hardwearing carpet, made of 100% recycled Econyl® yarn. This flat-woven carpet has a low, dense weave that gives it a soft, pleasant quality.

Available as square carpet tiles, ZigZag-Tiles® and LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression. STELLAR LockTiles® won the prestigious iF DESIGN AWARD 2024.

Available in nine well-balanced colours. Custom colours available from +200 m².

For more information on LockTiles® and ZigZag® - see pages 36-39.

NORDIC

– Nordic beauty for all times

Nordic offers a similarly simple design as COM 1000 and is the essence of a timeless carpet with high quality as the key factor. The classic expression sparks associations to cobblestone paving, a classic architectural element in the urban space.

With its Nordic simplicity, based on proud weaving traditions, this carpet is a beautiful choice at all times and for any type of commercial project. Like most Fletco carpets, Nordic is woven of white, undyed yarn and dyed after weaving, which offers a high degree of flexibility for specific commissions, a wider colour range and the possibility of custom colours.

Available as broadloom, square carpet tiles, ZigZag-Tiles® or LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression.

Available from our warehouse in 18 carefully curated colours. Custom colours available from 200+ m². Felt backing from +200 m².

COM 1000

– quality and functionality at all times

With its stringently simple design, COM 1000 is the essence of a timeless carpet with an emphasis on exquisite quality and exceptional functionality. The classic expression sparks associations to cobblestone paving, a classic architectural element in the urban space.

The flat-woven carpet is the obvious first choice in settings with extraordinary cleaning requirements along with high standards for quality and comfort. COM 1000 is woven from dyed-in-the-wool yarn, which ensures that the carpet will stay beautiful in settings that are subject to especially demanding cleaning procedures.

Available as broadloom, square carpet tiles, ZigZag-Tiles® or LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression.

Available from our warehouse in 10 timeless colours. Felt backing from +200 m².

SEBASTIAN WRONG BY FLETCO®

– form, flexibility and creativity

Award-winning concept by the acclaimed British designer Sebastian Wrong that the collection is named after. The carefully thought-out design concept – based on the Nordic carpet tile – puts a priority on form and flexibility and inspires creativity. With laser-cut carpet tiles in no fewer than nine different shapes and five colour categories, Sebastian Wrong by Fletco® offers virtually endless possibilities for creating unique flooring solutions in the sublime quality that characterizes Fletco's contract carpets.

The nine geometric shapes can be combined in numerous ways to create striking carpets, including patterns with a 3D effect, and design elements in their own right. The modular collection also invites you to let forms and colours engage in a dialogue with the architectural and the design context in the room or the building where the specific carpet is installed to create a strong foundation for lived life.

Available in 18 classic colours grouped into five curated colour categories. Custom colours available from 200+ m².

NORDIC LIVING

– style and comfort in one

Nordic Living brings a refreshing touch to the classic flat-woven bouclé pile. The dense loops with the recurring rounded shapes spark associations to the countless apples that are harvested every year in local Danish orchards and stacked, row after row, in apple crates to find their way into lunch boxes, cakes and dinners as the essence of the Nordic lifestyle and hygge.

The unique weave gives the hardwearing carpet a vibrant colour play and a lovely Scandinavian expression that makes Nordic Living a beautiful and elegant choice. The carpet is available as broadloom and as square carpet tiles in a beautiful colour scale that includes classic colours as well as livelier notes for bolder interiors.

Available from our warehouse in 17 stunning colours. Custom colours available from 200+ m². Felt backing from +200 m².

APIS

Honeycomb patterns and biodiversity

Striking modular carpet collection created in collaboration with the international design brand Yo² and named after the Latin word for bees. The design development drew inspiration from the significance of bees for nature and biodiversity, and the beautiful geometric pattern of the Apis collection takes its unmistakeable inspiration from the honeycomb where the bees store their sweet honey.

The Apis collection is a celebration of the vitality and ever-changing forms of nature and consists of three designs: Alpha, Beta and Gamma, which have varying degrees of colour saturation and are rich in the art of suggestion. In Alpha, the geometric pattern is barely visible on the rustic background, while it is most distinct in Gamma. Each design is beautiful in itself but takes on additional life when the patterns are combined. The carpet tiles are available in four sizes and are randomly laid without a pattern repeat. Apis lends the floor a unique and dynamic expression with natural patina from day one. In combination with sublime wearability, this will keep the carpet looking beautiful for many years to come.

Available in three beautiful designs, four sizes and seven organic colours.

THE APIS CONCEPT IN FOUR STEPS

1 CHOOSE A COLOUR

Whether you stick to one colour or play with multiple colours, you can have a unique flooring solution in any room.

2 SELECT DESIGNS

The artistic expression comes automatically when you choose tiles from the Apis collection.

3 CHOOSE TILE SHAPE

Apis is available in four different tile shapes, laser-cut from a large 200x200 cm platinum. Options are: 25x100 cm, 50x50 cm, 50x100 cm or 100x100 cm.

4 INSTALL RANDOMLY

To ensure a vibrant, graphic effect on the floor, the tiles are not numbered. It is part of the design that the tiles should be installed randomly.

ART WEAVE BY FLETCO®

– raw, patinated, artistic structures

Art Weave by Fletco® realizes the vision of combining the raw, patinated look of an industrial floor with the exceptional acoustic properties of a flat-woven carpet. The four different designs of this modular collection were inspired by both natural and manmade materials, such as stone and concrete, and are digitally printed on the hardwearing surface, where the underlying weave brings an added dimension to the rugged expression.

The award-winning Art Weave by Fletco® collection makes it easy to create a unique, durable floor solution with a dynamic character, as the individual carpet tiles combine to form an expressionist artwork at floor level. The organic design not only brings life and character to the surroundings but also ensures that the carpet will continue to look beautiful for many years to come.

Available in four selected designs, four different shapes and a variety of organic colours.

THE CONCEPT

The design of Art Weave is inspired by the unique structures in different materials, which are interwoven into a living, organic, and graphic direction. The expressions, colours and shapes makes it easy to create a living and unique flooring solutions.

LAYERS BY SEBASTIAN WRONG

– a modern take on prehistoric layers

Award-winning modular collection by the acclaimed British designer Sebastian Wrong, who has given the traditional carpet tile a modern and unique aesthetic expression using digitally printed colours. The visual depth of Layers by Sebastian Wrong® has been brought to life in an innovative process, where linear patterns are interlaced and emerge layer by layer, reminiscent of the layers of volcanic ash in the moler cliffs on the small Danish island of Fur, which offer a glimpse into our prehistoric past.

This unique collection of carpet tiles includes 13 digitally printed colours and two shapes – planks and tiles – that can be combined as desired. The colour scale was curated by Sebastian Wrong and carefully matched to allow for a wide range of beautiful colour combinations that go hand in hand with the design elements of a project.

Available in 13 timeless colours. Custom colours available from 200+ m².

EX-DONO QUARTET

– the rich diversity of life

Ex-Dono Quartet is a contract carpet that combines wearability and good acoustic properties with an expression of natural poetry. The coarse pile is tufted in a staggered pattern full of artistic vigour and details, as if the carpet were a flowery meadow in all its poetic exuberance, with flowers and grasses representing the rich diversity of life.

The organic appearance of the carpet is underscored with muted tone-on-tone colourways. This gives Ex-Dono Quartet a beautiful, mottled expression that adds subtle character to historical architectural interiors as well as new builds. Thanks to the high, tufted pile, the carpet is soft underfoot and noise-dampening. Available as broadloom and as square carpet tiles.

Available in 18 classic colours. Custom colours available from 200+ m². Felt backing from +200 m².

PENTA & PENTA STRIPE

– the budding green revolution

At first glance, with their small, dense loops, Penta and Penta Stripe may look like a traditional bouclé carpet. However, an in-depth look at the design reveals a different story, like the first sprouts in a field, pushing up with exuberant vitality.

Penta and Penta Stripe is a revolutionizing yarn-dyed tufted carpet in four layers. All materials and every single layer are carefully selected with an emphasis on sustainability, total product weight and indoor climate comfort – key elements that help bring this classic design into the future. The dyed-in-the-wool yarn is a top choice when special cleaning criteria apply, as it ensures that the carpet maintains its beautiful appearance over time.

The carpet comes in two timeless versions: Penta, which brings a uniform, understated expression, and Penta Stripe, whose simple and elegant stripes add a little more character without dominating the interior. Both carpets are available both as broadloom and as square carpet tiles in a muted, universally applicable colour scale.

Penta is available in six colours, Penta Stripe in five.

ZENITH

– soft as the green forest floor

Zenith is soft, like a mossy forest floor, and has exceptional noise-dampening properties. With its tufted cut pile, the carpet brings the deep, quiet calm of the forest inside – the peaceful atmosphere of nature that is so coveted in our modern life.

In addition to its positive contribution to interior acoustics, Zenith creates a calm, cosy atmosphere with its natural warmth and soft expression. The hardwearing carpet is well suited to high-intensity use in architectural and interior projects with a focus on the high quality and durability of the individual design elements. Available as broadloom and as square carpet tiles in a wealth of vibrant colours that create an exclusive expression.

Available in 18 vibrant colours. Custom colours available from 200+ m². Felt backing from +200 m².

BROADLOOM
BY FLETCO CARPETS

CHAIN

– culture-bearing and sustainable

With its stringent design and robust weave, Chain is true to the elegance and venerable history of weaving. The interweaving of warp and weft brings the flat-woven carpet to life. In addition to the continued chain of weaving history, the name also refers to another significant invention, namely the bicycle chain. Denmark has more bicycles per capita than any other country in the world, cycling is a natural part of our culture – and many people use the bicycle as their primary mode of transport, to the benefit of both people and the environment.

Chain is made of 100% recycled Econyl® yarn. In combination with the durable design and sublime wearability, this makes the flat-woven carpet well suited for design, interior and architectural projects where sustainability goes hand in hand with aesthetics and uncompromising quality.

Available in 13 timeless colours. Custom colours available from +200 m².
Felt backing from +200 m².

COM 1000

– quality and functionality at all times

With its stringently simple design, COM 1000 is the essence of a timeless carpet with an emphasis on exquisite quality and exceptional functionality. The classic expression sparks associations to cobblestone paving, a classic architectural element in the urban space.

The flat-woven carpet is the obvious first choice in settings with extraordinary cleaning requirements along with high standards for quality and comfort. COM 1000 is woven from dyed-in-the-wool yarn, which ensures that the carpet will stay beautiful in settings that are subject to especially demanding cleaning procedures.

Available as broadloom, square carpet tiles, ZigZag-Tiles® or LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression.

Available from our warehouse in 10 timeless colours. Felt backing from +200 m².

For more information on carpet tile solutions, please see separate catalog.

DUO

– like neat and orderly lines in the landscape

Duo is classical flat-woven carpet designs based on proud traditions of weaving craftsmanship and characterized by extreme durability and a subtle weave. The elegant, almost minimalist expression with clean, straight lines brings to mind the countless fields throughout the Danish landscape, which follow the same orderly pattern, year after year, as they have for generations.

With their harmonious surface, Duo complement modern and more traditional architecture equally well. Uno is defined by uniform lines, while Duo presents a two-part linear expression with both wide and narrow lines. The design is available in a broad palette of standard colours ranging from classic earth tones to more vibrant accent notes, depending on whether the carpet should form a calm foundation or accentuate other design elements.

Duo is available in 37 colours from our warehouse. Custom colours available from 200+ m². Felt backing available from +200 m². Felt backing from +200 m².

HØJER KONTRAKT® ORIGINAL

– infinity at the Wadden Sea since 1899

Højer Kontrakt® Original is, in every regard, a classic, original design in the category of tufted carpets. This woollen carpet is a bouclé weave with small, dense loops on the surface and has been in production in Denmark since 1899. The carpet design is named after the town of Højer, which is located at the edge of the Tøndermarsken marshlands, surrounded by grazing sheep and in close proximity to the seawalls and wide open lands near the Wadden Sea – a UNESCO World Heritage site in south-western Denmark.

The timeless Højer Kontrakt® Original carpet has been part of Fletco’s collection since 2013 and is made of top-quality New Zealand wool. The hand-dyed yarn has a unique melange effect that highlights the natural play of colours in the sheep’s wool. While this is especially pronounced in the beige and grey notes, the intrinsic beauty of the wool yarn is also evident in the more saturated colours and brings a warm feel to the interior.

Available in 12 classic colours. Custom colours available from +200 m². Felt backing from +200 m².

NORDIC

– Nordic beauty for all times

Nordic offers a similarly simple design as COM 1000 and is the essence of a timeless carpet with high quality as the key factor. The classic expression sparks associations to cobblestone paving, a classic architectural element in the urban space.

With its Nordic simplicity, based on proud weaving traditions, this carpet is a beautiful choice at all times and for any type of commercial project. Like most Fletco carpets, Nordic is woven of white, undyed yarn and dyed after weaving, which offers a high degree of flexibility for specific commissions, a wider colour range and the possibility of custom colours.

Available as broadloom, square carpet tiles, ZigZag-Tiles® or LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression.

Available from our warehouse in 18 carefully curated colours. Custom colours available from 200+ m². Felt backing from +200 m².

NORDIC LIVING

– style and comfort in one

Nordic Living brings a refreshing touch to the classic flat-woven bouclé pile. The dense loops with the recurring rounded shapes spark associations to the countless apples that are harvested every year in local Danish orchards and stacked, row after row, in apple crates to find their way into lunch boxes, cakes and dinners as the essence of the Nordic lifestyle and hygge.

The unique weave gives the hardwearing carpet a vibrant colour play and a lovely Scandinavian expression that makes Nordic Living a beautiful and elegant choice. The carpet is available as broadloom and as square carpet tiles in a beautiful colour scale that includes classic colours as well as livelier notes for bolder interiors.

Available from our warehouse in 17 stunning colours. Custom colours available from 200+ m². Felt backing from +200 m².

Nordic Living - col. 200

NOVE

– timeless herringbone

Nove is a bouclé weave in a distinctive design that offers a subtle and modern interpretation of a classic herringbone pattern. With reference to the exemplary anatomy of fish, the herringbone pattern has for centuries been used on everything from tailormade suits to stately floors in precious woods. In extension of this tradition, the design has become a mark of elegance, timelessness and exclusive quality.

Nove embodies these same qualities. With its unmatched wearability, this elegant flat-woven carpet is well suited for workplace settings. Thanks to its sophisticated woven design, which brings a contemporary quality to the classic herringbone pattern, and a carefully curated colour palette, Nove will maintain both its beauty and its relevance for many years to come.

Available in 13 muted colours. Custom colours available from 200+ m². Felt backing from +200 m².

QUATTRO

– nature's beautiful asymmetry

With its fascinating asymmetrical pattern, Quattro exemplifies the possibility of creating complex designs with high-precision craftsmanship at the loom. The pattern of the flat-woven carpet encapsulates the beauty of plants, as manifested in the coarse leaf structures of beans, potatoes or other plants in the kitchen garden. In combination with the plush weave, the effect is an expression that is both robust and soft.

Quattro brings character and vitality to any interior, from small office spaces to large masterworks of architecture, while the repetitive structure of the asymmetrical pattern provides an elegant and calming visual field. A striking contract carpet that combines quality and durability with a beautiful design.

Available in 12 classic colours. Custom colours available from +200 m². Felt backing from +200 m².

Quattro - col. 300

COUTURE

– classic softness from the world of fashion

This silky soft and exclusive velour quality is a true classic with exceptional acoustic properties due to the short, upright pile. Couture takes its name from the world of fashion, where velour is beloved, from Paris to Copenhagen, for its inherent tactility, weight and extravagance, which add a stunning expression to any interior or fashion statement.

In addition to promoting good acoustics by dampening the sound of footfalls, Couture also brings a soft, nurturing tactile sense of bespoke luxury to business settings. The beautiful velour carpet forms a sensuous foundation that is a perfect complement for modern as well as more historical interiors. In a celebration of the multifaceted expressions of fashion, Couture comes in a wide range of inviting colours.

Available in 13 luxurious colours from our warehouse. Custom colours available from 200+ m². Felt backing from +200 m².

EX-DONO QUARTET

– the rich diversity of life

Ex-Dono Quartet is a contract carpet that combines wearability and good acoustic properties with an expression of natural poetry. The coarse pile is tufted in a staggered pattern full of artistic vigour and details, as if the carpet were a flowery meadow in all its poetic exuberance, with flowers and grasses representing the rich diversity of life.

The organic appearance of the carpet is underscored with muted tone-on-tone colourways. This gives Ex-Dono Quartet a beautiful, mottled expression that adds subtle character to historical architectural interiors as well as new builds. Thanks to the high, tufted pile, the carpet is soft underfoot and noise-dampening. Available as broadloom and as square carpet tiles.

Available in 18 classic colours. Custom colours available from 200+ m². Felt backing from +200 m².

PENTA & PENTA STRIPE

– the budding green revolution

At first glance, with their small, dense loops, Penta and Penta Stripe may look like a traditional bouclé carpet. However, an in-depth look at the design reveals a different story, like the first sprouts in a field, pushing up with exuberant vitality.

Penta and Penta Stripe is a revolutionizing yarn-dyed tufted carpet in four layers. All materials and every single layer are carefully selected with an emphasis on sustainability, total product weight and indoor climate comfort – key elements that help bring this classic design into the future. The dyed-in-the-wool yarn is a top choice when special cleaning criteria apply, as it ensures that the carpet maintains its beautiful appearance over time.

The carpet comes in two timeless versions: Penta, which brings a uniform, understated expression, and Penta Stripe, whose simple and elegant stripes add a little more character without dominating the interior. Both carpets are available both as broadloom and as square carpet tiles in a muted, universally applicable colour scale.

Penta is available in six colours, Penta Stripe in five.

ZENITH

– soft as the green forest floor

Zenith is soft, like a mossy forest floor, and has exceptional noise-dampening properties. With its tufted cut pile, the carpet brings the deep, quiet calm of the forest inside – the peaceful atmosphere of nature that is so coveted in our modern life.

In addition to its positive contribution to interior acoustics, Zenith creates a calm, cosy atmosphere with its natural warmth and soft expression. The hardwearing carpet is well suited to high-intensity use in architectural and interior projects with a focus on the high quality and durability of the individual design elements. Available as broadloom and as square carpet tiles in a wealth of vibrant colours that create an exclusive expression.

Available in 18 vibrant colours. Custom colours available from 200+ m². Felt backing from +200 m².

A SUSTAINABLE FOUNDATION

TAKING THE LEAD WITH ATTENTION TO DETAIL

We believe firmly that using nature’s resources in manufacturing obliges us to be as responsible as possible. This means that top quality is a key priority in every part of our product development and manufacturing processes. To us, sustainability is not an abstract concept but a concrete part of what we do every day.

We take the lead by embracing new production methods and materials with the ambition of going above and beyond the current standards in the carpet industry. And we go into detail to create durable carpets based on versatile, classic designs and uncompromising quality standards to make sure they will stay beautiful for many years to come. To us, this is the essence of sustainability.

We use recycled materials whenever possible: the carpet backing is made of recycled plastic bottles, the carpet tubes are made of recycled plastic, and even the smallest bit of yarn is recycled along with cardboard and other scraps from our production to avoid wasting resources. Since 2016, we have contributed to the green transition in Denmark and bought fully CO₂-neutral wind power equivalent to our annual energy consumption.

CERTIFICATIONS AND COMMON SENSE

WE TAKE RESPONSIBILITY FOR PLANET AND PEOPLE

Regard for the environment is part of our DNA, and as a responsible manufacturer, we produce carpets with many of the general certifications designed to help architects, distributors and consumers around the world choose sustainable products. However, certifications are only part of what makes Fletco’s carpets a safe and responsible choice when it comes to looking after both global and indoor climate.

We take responsibility for planet and people by creating quality products with long durability and – across all our certifications – using common sense as our most important guide in navigating the complex concerns in relation to total climate footprint and environmental impact.

GOLD FOR COMFORT AND INDOOR CLIMATE

WE CARE ABOUT INDOOR CLIMATE AND AIR QUALITY

Thanks to our innovative production equipment, all our carpets are made without the use of bitumen, latex, PVC, PFAS or other harmful substances that have traditionally been part of carpet production.

We care about indoor climate and air quality, with low emission of air pollutants as a key factor. All our contract carpets carry the Eurofins Indoor Air Comfort Gold label for complying with the strictest requirements for the emission of VOCs (Volatile Organic Compounds). This umbrella certification encompasses the most significant and far-reaching voluntary European environmental certificates, including Cradle to Cradle, the Nordic Swan Ecolabel, Danish Indoor Climate Labelling and, partially, M1. The Eurofins Indoor Air Comfort Gold certificate is thus accepted on a par with voluntary international environmental certifications such as BREEAM and LEED in environmentally sustainable construction.

BECAUSE WE PROTECT THE ENVIRONMENT

EPD – THE ENVIRONMENTAL IMPACT OF OUR CARPETS

All our contract carpets have EPDs (Environmental Product Declaration) that document the individual product’s environmental impact and thus provide the necessary data for calculating the total environmental impact of an interior or building project. The EPDs are based on international ISO standards and are third-party-verified.

PEF – OUR COMBINED CLIMATE FOOTPRINT

For years, CO₂ emission has been the dominant focus, but it is just a small component of the many, mostly harmful greenhouse gases that are emitted over a product’s lifecycle. CO₂e – carbon dioxide equivalent – is a measure of the total amount of greenhouse gas emissions over the full lifecycle of a product.

Why PEF? To ensure mutually comparable CO₂e assessments, the EU has established a new calculation method called PEF (Product Environmental Footprint), which contains predefined measures for all aspects of the PEF. Thus, if any data is missing, worst-case figures will be applied.

Compared with the EPD, the PEF can often contribute twice as many points to building certifications as BREEAM and LEED, because the broader data input makes the calculations more accurate.

We have PEF reports for all our contract qualities. By choosing contract carpets whose CO₂e impact is based on PEF calculations you will automatically meet the documentation requirements for your company’s CSRD reporting.

OUR CONTRIBUTION TO THE GREEN TRANSITION

Wind-generated electricity causes no CO₂ or particle emissions. In order to contribute to the green transition in Denmark, our production facilities are powered by fully CO₂-neutral Danish wind energy.

In 2020, we installed a geothermal system to reduce our consumption of fossil fuels. Most of the waste heat from our production facility is captured and utilized. For example, we recover and use heat from our tile production and compressors to heat our buildings.

We are continually looking into new possibilities, and when we develop new carpet qualities, we always aim to reduce our CO₂e emissions without compromising on quality.
